ABOUT US

20 YEARS OF EXPERIENCE

RIWELD s.r.o. is an experienced professional in the field of the renovation of machine parts for heavy industry and agriculture. We use advanced technologies and workflows to achieve high precision and resilience of refurbished parts without the need to dismantle them, all at a cost lower than the cost of a new component.

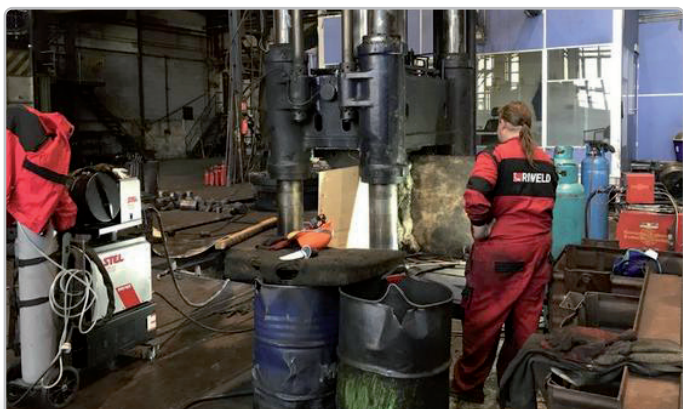

FLEXIBILITY AND LOW COST

Our advantage is that we are able to carry out a large amount of repairs directly at our premises, during weekends or night shifts to minimize repair time which positively impacts customers production and operations.

SERVICES

FORGES AND PRESS SHOPS

Repairs of hammers and presses by welding with possible final mechanical processing of the parts made of cast iron, cast steel, solid steel and various other alloys of higher carbon content, manganese.

MINING INDUSTRY

Repairs by welding, parts production and supply of replacement systems in the mining industry: General repairs of loaders and diggers, repairs of primary and secondary crushers, frits, hoppers, slides.
